**WORLD'S FIRST DRIVE-THRU SUPERCENTER®**

**World's First Consolidated Multi-Product Lines/Service, Drive-Thru Supercenter for High-Speed/Volume Delivery to Drive-Thru Customers.**

**First Scheduled Opening, December 2006 – Albuquerque, NM/Tucson, AZ.**

Las Cruces, NM – Nov. 2004, AutoCart, LLC is pleased to announce the construction of the worlds first Drive-thru Supercenter. This 130,000 Sq. Ft. facility is capable of delivering over 25,000 SKU's of various classifications of products directly to drive-thru customers from any of 60 ordering/pickup stations within the Drive-thru Supercenter facility. The first AutoCart facilities will be built in Albuquerque, NM and Tucson AZ. The opening is planned for the 4<sup>th</sup> quarter of 2005. AutoCart, LLC plans to open over 1500 AutoCart facilities in North America over the next decade according to Steve Beardsley, President of AutoCart, LLC.

The 17 plus classifications of products and services at the AutoCart Drive-thru Supercenter facility include:

- Grocery
- Pharmacy
- Banking
- Movie and Game Rental
- Food Service Restaurant
- Bakery
- Office Supplies
- Florists
- Copy Center
- Media Sales
- Photography Development
- Dry Cleaning
- Liquor
- Parcel Repository
- Lottery Sales
- Event Tickets
- Key Duplication

*...the above conveniences are accessed, consolidated, bagged and delivered directly in totes from a shuttle/ lift directly to the customer's vehicle.*

According to Mr. Beardsley, "We feel that AutoCart's primary benefit is the coalescence of converging technologies to provide a consolidated product and service availability to retail customers. This combined approach will give AutoCart, LLC a distinctive advantage to all box stores, conventional grocery and stand alone retailers. Customers will choose the AutoCart Supercenter facility every time over fighting traffic, harsh weather conditions and parking problems that are inherent when shopping at conventional retail facilities. There are two consumables when that once spent, the consumers never get back. These are time and money. The AutoCart Drive-Thru Supercenter is designed to save every consumer both time and money."

#### **Customer Benefits:**

Mr. Beardsley, states:

1. "AutoCart" will change the scope of retailing by providing customers with almost all of their convenience needs (from over 17 product and service classifications) through one consolidated Drive-thru Supercenter. Shopping at AutoCart is entirely done from the customer's car. Onsite customers will order from an interactive drop down screen 3at all 60 order/pickup stations. Offsite customers will be able to order from their PC/laptop, or a PDA to purchase products or perform various services for designated time arrival pickup.
2. The facility is very interactive as well. Customers will be able to communicate to any of the tenants' supervisors from each of the 60-order/pickup stations while waiting for their delivery to be made directly to their vehicle. A shuttle/lift containing the customer's order (via tote) will open up directly next to the car. The customer will remove his/her bags and exit the facility in a manner of minutes.
3. AutoCart is a patented one stop Drive-thru Supercenter facility that is designed to eliminate multiple shopping trips. The Drive-thru Supercenter allows customers to get the multitude of the daily errands done in one stop. Imagine, getting your needed grocery items, renting a movie for the kids, picking up sandwiches and salads for lunch and bakery items for breakfast, dropping off your dry cleaning, picking up your pharmaceutical prescriptions, getting a printing cartridge for the office, doing your banking functions, and picking up a flowers for your wife, in one stop within one complex and image all of that just taking just a few minutes... **You will be able to do this and more in the near future at the AutoCart Drive-thru Supercenter.**

FKI Logistex, one of the leading materials handling companies in the world, will provide tenants of the AutoCart Drive-thru Supercenter with the benefits of an advanced automated "Warehouse Management System" (WMS). According to Al Jervinsky, Systems Sales Supervisor Manager at FKI Logistex, "This is the first system that places our expertise of high-speed material's handling developed for our hundreds of distribution centers to a retail configuration. The concept can revolutionize retailing as we know it today and FKI Logistex is very excited about the tremendous future opportunity and benefits it provides to the AutoCart tenants as well as to AutoCart customers."

#### **Tenant Benefits:**

- ❖ Tenants housed in the AutoCart facility will greatly eliminate overhead costs, shrinkage, and realize much greater profit margins than present retail establishments through a greatly reduced operational cost.
  - No Shrinkage or theft
  - No Carts
  - No Consumer ambiance
  - Reduced touches
  - Greatly reduced labor cost

- Greatly reduced overhead and operational costs
- ❖ Tenants will greatly benefit from tremendous crossover market exposure from a combined customer base.
- ❖ The shared start up cost for a tenant is greatly reduced when compared to a conventional retail facility.
- ❖ The Autocart facility can provide product and service delivery to over 7000 cars a day, because it is many-times the volume of any conventional drive-thru facility.

Michael Saigh, CEO of Autocart, LLC says, “AutoCart, LLC owns the exclusive patents for Drive-thru Supercenter facilitation. The patent rights will be used to protect the tenants of the AutoCart facility and provide tenants the opportunity to grow. We also feel the AutoCart Supercenter complex will be a perfect arena for retailers that provide superior service and value to their customers while retaining a strong competitive advantage over conventional retailers. AutoCart, LLC feels that our patented (USPTO/INT’L) facility represents the next generation of retailing. Consumer acceptance from many surveys taken over the last several years have been extremely favorable.”

According to Mr. Jervinsky, “This system will be capable of delivering thousands of product choices directly to the drive-thru customer’s car from a shuttle within a few minutes of ordering. The WMS will also provide the technologies to order from home or the office for time designated pickup at the AutoCart facility.”
