

Press release - for immediate publication

Announcing AutoTram® Conveyance® Centers

Conveyance® Centers are the next generation of convenience stores and one of the AutoCart® series of patented processes. AutoTram® features a convenient store, pharmacy, bank, dessert counter and banking all within the Conveyance® Center. Most importantly, customers can order at the gasoline pump islands and have their purchases delivered, with Transporters, right to their car often before they complete pumping gasoline. Our patents insure that no other convenience or retail store can duplicate this service. AutoTram® does not detract from walk-in sales but adds substantially to outside up-sells. We present the contents of the store to the customer, and most importantly also to the passengers.

Each partner, located within the AutoTram®, provides quality products for walk-ins, and the Transporters allow additional sales for delivery to outside orders. AutoTram® offers our partners a greater market share, more locations, security and safety for both employees and customers.

How it works

Convenience begins at the fuel pumps. While pumping gasoline the customer can use the super easy kiosk screens to order items, pay for the items, and have them delivered right to their car. AutoTram® Transporters automatically and mechanically speed the purchases from the store to the shopper. Additionally Shoppers can also order on site with our kiosks, or order ahead by phone, PC, or any compatible electronic device, and have their purchases delivered right to their car at designated pick-up points, located away from the fuel pumps. The Conveyance® Center is dedicated to convenient, quick and easy shopping.

Safety

Shoppers find the straightforward process quick and easy to use. Safety is assured as customers are not walking through traffic to enter and exit the store. Valuables and children are not left unattended because the driver stays with the car. During late night hours the employees are safely insulated inside the store but still can provide the customers with their purchases.

New Construction or Retrofit

The software, Transporters and kiosks can simply be incorporated into new construction plans and also easily adapted to existing locations. Return on Investment time intervals are minimal and easy to compute. The sales increases are measurable.

AutoCart® is a member of the National Association of Convenience Centers. AutoCart® has a family of patents to provide delivery convenience for our customers.
